

Assembly Instructions for the 2859 Riolo Garden Bench

1. Locate a suitable site for your bench that is level and provides a pleasing viewing angle.
2. Locate the two 2589P Pedestals and space them so they will align with the tapped holes in the 2859T Back.
3. With suitable assistance lift the Back and locate it on the Pedestals. Insert the bolts with flat washers in the holes in the Pedestal back supports and into the threaded inserts in the back. Tighten the bolts to secure the Pedestal and Back. These bolts should be tight but be careful not to over-tighten as this may cause cracking.
4. Place the 2859M Seat on the Pedestals and align it to the Back.
5. Apply a bead of silicone adhesive to the bevelled edges of the screw caps and place them over the bolt heads in the back of the pedestals.

Important Winter Care

Do not allow water to collect and freeze in fountain bowl(s) or shell. Do not allow fountain to sit in a pool of ice. Disassemble entire fountain and pump and store indoors during the winter season.

If you cannot store your fountain indoors during the winter season, you must at least protect it from ice collection or exposure. "How" to protect your fountain during the winter: First remove the statue and pump, storing them inside if possible. Next locate the drain plug on the underside of the bowl(s) or shell. Remove the drain plug to drain any water 'trapped' between the walls of the bowl(s) or shell. Then fill the bowl(s) or shell with an absorbent material such as burlap, blanket, etc. Finally cover the entire fountain with a Henri Fountain cover. Should condensation droplets form on the inside of the cover, they will be absorbed by the material. By following these simple and sensible precautions during the winter season, you will protect your fountain for years of enjoyment.
