

## Instructions for Sea Otters fountain 4485 F7

1. Set the basin in a firm, level position.
2. Push the tubing onto the pump outlet and place the pump into basin with the cable exiting at the rear.
3. Now place the bottom and middle spills in position as shown in the diagram.
4. Feed the tubing up through the bottom and middle sections and connect onto top spill before putting this piece into position. Now place the otters in position as shown.
5. For added stability or balance, use the mastic strips and plastic wedges supplied.
6. Fill the basin with water. To prevent the growth of unsightly algae, add Henri Studio water clarifier as directed.
7. Connect the pump to your electricity supply-see page 18 of fact book.

### Important Winter Care

**Do not allow water to collect and freeze in fountain bowl(s) or shell. Do not allow fountain to sit in a pool of ice. Disassemble entire fountain and pump and store indoors during the winter season.**

If you cannot store your fountain indoors during the winter season, you must at least protect it from ice collection or exposure. "How" to protect your fountain during the winter: First remove the statue and pump, storing them inside if possible. Next locate the drain plug on the underside of the bowl(s) or shell. Remove the drain plug to drain any water 'trapped' between the walls of the bowl(s) or shell. Then fill the bowl(s) or shell with an absorbent material such as burlap, blanket, etc. Finally cover the entire fountain with a Henri Fountain cover. Should condensation droplets form on the inside of the cover, they will be absorbed by the material. By following these simple and sensible precautions during the winter season, you will protect your fountain for years of enjoyment.
